Harmony Ink Dispenser

Harmony Ink and Thinner Dispenser

The tabletop Harmony Ink Dispenser is a compact and reliable system for streamlining the colormatching process. No more messy cans and dried ink particles – just pour the ink into the canisters for easy mixing and storage!

The hermetically sealable, solvent resistant canisters hold up to 1.5 liters of ink or thinner. The 12 canister model can conveniently accommodate a twelve color mixing system and facilitate mixing of PMS colors. The 16 canister model allows adding a combination of thinners or opaque colors.

The Harmony Dispenser has two graduated pumps, one for coarse control over the ink and the other for fine control, which allows dispensing at 0.1 gram accuracy. The easily removable nozzles are designed to minimize dripping. Self-sealing wiper pads prevent nozzle clogging and drying. With the automatic mixing feature, you can set mixing to one to two minutes, which helps to keep the ink at the correct viscosity. The turntable has positive lock and rotates in either direction to save time and effort. Heavy duty digital scale (+/- 0.1 gram) is included.

Eliminate guesswork and mess from your ink equation, only mix what you want!

STANDARD FEATURES

1.5 liter solvent resistant one-piece molded canisters

Coarse and Fine adjustment over ink flow

Positive locking turntable

Motorized ink mixing - all canisters at the same time

Self-sealing nozzles with drip control

Digital scale (+/- 0.1 gram)

STANDARD LIMITS

12 and 16 canister units available

POWER REQUIREMENTS & DIMENSIONS

Voltage (60Hz).....	120V
Typical Dimensions (D x H).....	30"x 23" (12 canister unit)
37"x 23" (16 canister unit)
Approximate Weight (lbs) net/crated.....	60/75lbs
Crate Size (L x W x H).....	34"x 34" x 28" (12 canister unit)
42" x 42" x 28" (16 canister unit)

L, W, H, D – Length, width, height, diameter
